1954 --

FUCHSIA LIST

-- 1954

FUCHSIA BASKETS have long been used in our garden to add enjoyment during summer months. We covet the same pleasure for you. The prodigality of bloom which they provide is equalled only by the variety of color in flowers and foliage. Simple descriptions fail to do justice to the diversity of interest possible with this one group of flowers. The combination of Fuchsias with other plants, particularly trailing ones - offers endless possibilities for hanging baskets and planters of all types. Upright growing Fuchsias will relieve the dullness of shady corners which are otherwise flowerless in summer and early fall. Transplant a Fuchsia from original pot without breaking root ball, putting it into larger pot, hanging basket, planter or open bed. Desirable growing conditions include rich soil with plenty of leaf mold added, considerable moisture, diffused sunlight, and weekly feeding. Liquid fish fertilizer is recommended and may be alternated with some all-purpose fertilizer containing sufficient phosphate and potash to insure lots of flowers.

50 Cents EachHIGHLY RECOMMENDED FUCHSIAS-- 50 Cents Each

Ave Maria	Double; all white; must have cool conditions.
Baby Bunting	Sepals palest rose and corolla equally pale orchid.
Balkan Trailer	Very dainty foliage and flower in pinkish apricot.
*Beauty of Trowbridge	Single; deep rose-pink; sepals and long tube waxy white.
*Bubble Hanger	Single; apricot pink; corolla flesh; distinctive buds.
*Chang	Single; red with short skirt of orange; strong upright grower.
Columbia	Long tube of white; pink sepals appearing edged with white.
Display	Wide open sepals, skirt of clear deep pink; free flowering. Upright.
Giant Cascade	Typical Fuchsia coloring; large flowers; trailing.
Henry Hinkle	Serratifolia type; reddish foliage; flowers orange-rose.
Heron	Single blue-purple with deep red sepals; strong upright grower.
Jack Shahan	Strong willowy grower; heat tolerant; entire flower shades of lt. rose
John Davis	Free flowering; pink.
Kitty O'Day	Very double flowers, large; corolla white veined rose-red.
*Lucky Strike	Tube and sepals same shade of rose-red; upright growing.
Macrostemma alba	Profusely flowering; rose to bluish purple.
*Marinka	Hardy plant; orchid to white flowers; small but plentifully produced.
Messellanaica	Single crimson with reddish stems and leaves; trailing.
Procumbens	Crisp leaves and half-inch long flowers of bright rose.
Snowball	Interesting specie, trails along ground; small flowers of greenish yellow and mahogany.
The Doctor	White flowers of classical form; pink at base of sepals; vigorous.
*Thomasina	Wonderful foliage; long tube; salmon to rose flowers.
Titanic	Bushy; dark foliage; flowers terra cotta and orange.
Whitemost	Red sepals, double deep purple corolla; carmine at base.
	Single white; light pink sepals; free blooming, easy to grow.
<u>TRAILING CAMPANULA</u> - (Blue or White) to plant with Fuchsias - <u>25 Cents Each</u> .	
<u>PRICES APPLY</u> for month of <u>JUNE</u> only. Limited stock in many varieties makes it wise to list second and third choices when ordering.	
<u>WASHINGTON STATE RESIDENTS</u> - Please include state sales tax. <u>PLEASE ALLOW 10%</u> for postage, but in no case less than 25 Cents.	

*INDICATES a LARGER SIZE available at 75 Cents Each.

RHODODENDRONS AT ROBERTSONS'

A sensational purchase of quality Rhododendrons makes it possible for us to offer to the public thirty-five varieties of exceptionally well grown, large plants of outstanding hybrids.

A thousand specimen Rhododendrons from which to choose. Some varieties up to 5-feet in height.

<u>Star</u>	<u>Rating</u>	<u>Name</u>	<u>Color and Flowering Time</u>
**		Amy	Bright rose Late
*		Armistice Day	Blood red
		Azaleodendron	Yellow
***		Azor	Soft salmon Very late
***		Beauty of Littleworth F.C.C.	White Early

American Association of Nurserymen
 Washington State Nurserymen's Association

Nursery Hours: - Weekdays 8:00 to 4:30 all year round;
 Sundays (spring only) 10:00 to 4:30.

Terms: - Cash with order unless credit has been established. No mail orders under \$2.00. All prices f.o.b. Nursery. Washington residents - please include 3% state sales tax.

This year it has seemed impractical to publish a catalog as we have done in the past. A thousand kinds of plants are not easy to condense into a few short pages of description.

Constant shifting of prices due to changes in stock has made it impossible to stabilize a list. If you will keep this in mind when ordering, it will be appreciated. When possible, please state acceptable substitutes. May we urge all of our good friends and customers to write for quotations on plants or rooted cuttings of those items which are not listed - but which we likely grow. We will do our best to answer promptly. However, it is impossible to give lengthy advice and planting instructions individually.

WATER PLANTS -

(Each)

Lilies - red, white, yellow, or pink -	\$ 1.25
Hyacinth - floating plant for summer only -	.25
Fish greens - whichever types are in season - per bunch	.25
Iris - either yellow or blue-flowered -	.50
Forget-me-not, especially suited to moist soil or water -	.25
Sagittaria sinensis - extends above water with broad leaf -	.25
Sagittaria natans - short, grassy foliage - 6 for -	.25

DICHONDRA REPENS - Common name "Ponyfoot" which each leaf resembles.

A ground cover of great popularity for lawn substitute. The creeping stems root to form a dense mat. It thrives in sunshine and yet adapts itself to shade. May be sown in an old lawn or in newly prepared ground. In the latter case, attention to watering, fertilizing and weeding is essential for the first three months. Only a minimum of attention is required thereafter. Hardiness in the northern states is uncertain. A packet of 12,000 seeds sells for \$1.25 postpaid, and will suffice for 300 square feet. Germination time is about six days. Plants are usually available at 50-cents each or \$5.00 per dozen - but we do not recommend shipping them any distance.

GROUND COVERS - one of our specialties - individual plants are 25-Cents each; \$2.50 per dozen. Local trade can pick up a flat (12" x 24") at the dozen price.

**Ajuga genevensis* and *Ajuga reptans rubra* - fast growing Bugleflower; strongly matted roots help prevent erosion.

**Cotula squalida* - bronzed ferny leaves; shade loving.

Dianthus graniticus, *D. coccineus*, *D. deltoides* (Maiden Pink) - rock garden subjects often planted in large masses for best effect.

Lotus corniculatus - a legume for dry banks with poor soil.

Mentha requieni - a creeping mint with a tantalizing fragrance.

Nierembergia rivularis - earns the common name of Queenups by reason of the large white flowers which cover the gray mats in summer.

**Sagina subulata* - looks like moss but has tiny white star flowers; suitable for crevices or the spaces between stepping stones.

**Sedum acre*, *S. album*, *S. murale*, *S. reflexum* - all these varieties of Sedum are excellent for covering large areas.

**Thymus serpyllum* - several types are grown but the supply varies with the season. Lavendar, red, or white flowered as well as woolly leaved varieties are usually in stock.

**Vinca minor* - "Periwinkle" or "Creeping Myrtle" - white, blue, (with green or variegated leaves), wine purple and double flowered blue varieties.

GROUND COVERS of slower habit - priced as indicated.

**Arctostaphylos uva-ursi* - "Bearberry" - excellent broadleaved cover; second year plants are still quite small but suitable for setting out on one foot or 18-inch spacing - 50-cents each.

Epimedium macranthum roseum, *E. lilacina*, *E. niveum*, *E. pinnatum sulphureum* - dainty flowers in early spring followed by interesting leaves which color in the fall - 75-cents each.

**Euonymous radicans minima* - tiny thick leaves along trailing stems - 75-Cents
Polygonum vaccinaefolium - spikes of pink flowers in autumn - 50-cents.

**Vaccinium vitis-idae* - beautiful shiny foliage, edible berries - 50 cents & \$1.00.

NOTE: *Indicates persistent winter foliage.
